Chain Link Fence

Chain link fence, also known as cyclone fence, hurricane fence or diamond mesh fence, is a type of woven fence usually made of galvanized or PVC coated steel wire.

The wires are woven together to form beautiful diamond patterns. It offers a cost-effective solution for residential and commercial applications.

Typically, the shorter heights are commonly selected for residential uses while the taller heights are most often for commercial uses to provide more security.

Besides, it is a great option for road, railway, airport fencing, equipment and facilities protection, pet and small animal raising as well as zoo fencing.

Features & Application

Features

⊕ Security

It can create an enclosure to prevent pets or kids out of the yard and protect their security.

⊕ Durability

High quality raw materials ensure its great corrosion, rust and weather resistance performances.

⊕ Privacy & visibility

It can protect your privacy while maintaining a certain range of visibility.

⊕ Versatility

A variety of specifications and accessories for you to choose from to meet all your demands

⊕ Affordability

Its relatively inexpensive price is really a budget-friendly choice for all users.

⊕ Less maintenance

Its high strength, solid structure and corrosion and weather resistance performances make it strong enough and require less maintenance.

Application

It is widely used for residential and commercial applications to create a secure barrier and provide both visibility and security. Besides, it is a great option for road, railway and airport fencing, equipment and facilities protection, pet and small animal raising as well as zoo fencing.
